PIM NELISSEN

Nuclear Engineer

pimnelissen@icloud.com | +32 474 97 11 99 | Brussels, Belgium | PimNel.com | pim-nelissen | pim-n

EXPERIENCE

Design Engineer (Core Physics & Fuel)

Tractebel Engineering S.A.

Sep 2026 – *present* | Brussels, Belgium

Neutronics | Code-to-code benchmarking | Gen-IV | UQ

EDUCATION

M.Sc. Computational Science, Physics

Lund University

Sep 2024 – Jun 2026 | Lund, Sweden

- Was a teaching assistant for the introductory scientific programming course.
- Developed simulator for localization of gamma sources as part of thesis work, integrated successfully in existing research pipelines.
- Completed a large independent research project on advanced time series modelling for radioisotope concentrations in seaweed as a response to liquid seawater discharge of radioactive effluent.

ODE/PDEs | Radioecology | Reactor physics | Dataviz | Time series | Bayesian statistics | Machine learning

B.Sc. Physics

Lund University

Sep 2020 – Jun 2024 | Lund, Sweden

VOLUNTEERING

Digital Literacy Instructor

City Library Oss

Sep 2013 –Jun 2014 | Oss, Netherlands

- I hosted an education program for promoting digital skills (e.g. use email, search and save information) within the local community, particularly aimed at the elderly.

PUBLICATIONS

Student papers

- *Modelling Radionuclide Concentrations in Fucus on the Swedish West Coast*. 2026. [Online]. Available: lup.lub.lu.se/student-papers/record/9226168.
- *PG-RAD: A Tool for Simulating Radiometric Data for Mobile Radioactive Source Searches and In Situ Measurements*. 2026. [Online]. Available: lup.lub.lu.se/student-papers/record/9238749.

TRAININGS

Core Modeling for Core Design
GRE@T-PIONEeR, Chalmers University. Deterministic and Monte Carlo methods for LWR design.

Safety of Reactor Operations
Applied Nuclear Energy Laboratory, University of Pavia. Participated on scholarship from the European Nuclear Education Network.

ENEN# Nuclear Summer School
Budapest University of Tech. and Econ. Participated on scholarship from the European Nuclear Education Network.

HIGHLIGHTED COURSES

Computational Reactor Physics
Uppsala University. Fundamental reactor engineering concepts in Python/OpenMC.

Simulation Methods of Radiation Transport
Uppsala University. Detector simulation in FLUKA, Serpent and Geant4.

Reproducible data science and statistical learning
Lund University. FAIR principles, Data visualization, Bayesian statistics.

ONLINE WORKSHOPS

Modern Python in Depth
Leibniz Supercomputing Centre (Jan 2026)

HPC with Python
Jülich Supercomputing Centre (Jun 2025)

Intermediate Bash and Linux
HPC2N, Umeå University (Jun 2025)

Git, code testing and documentation
EPFL, CECAM, BioNT (Feb 2025)

TOOLKIT

WIMS | Serpent | Geant4 | OpenMC | Python | Linux | R (programming) | Git | SQL | MATLAB | TensorFlow
